Amino-Charged Energy Drink

Taurine aids in the metabolism of fat, and is also known to improve insulin sensitivity and boost your mood! It can help improve exercise performance and body composition.

L-Carnitine enhances performance by increasing the body's reliance on fat for energy; this reduces depletion of muscle glycogen. By reducing muscle tissue lactic acid build-up, performance athletes using L-Carnitine can extend duration of muscular exertion before fatigue.

On your way to do some cardio? Need a mid-afternoon "pick-me-up"? **A:CUTS** is designed to fit your life and your diet. Now Dye-Free!
