

• PROFESSIONAL GRADE SUPPLEMENTS •

ALLMAX introduces D-Aspartic Acid in a free-flowing powdered form. D-Aspartic Acid is a racemate isomer of the more common L-Aspartic Acid. Recent human clinical research using oral dosages of 3.12 g of D-Aspartic Acid revealed dramatic increases in Testosterone of 42% on average in just 12 days. ALLMAX has created a stand-alone Essentials form of this ingredient which allows you to precisely control the timing and cycling.\*

Increases in Testosterone can have a profound effect on strength, muscle size, density, thickness and fat loss. Increased Testosterone can also lead to increases in libido, a general feeling of well being and sexual performance enhancements.\*

Athletes and bodybuilders looking for a natural boost in their testosterone have found that a 2-week on and 1-week off cycle and repeat works best.\*

Made in USA with domestic and imported ingredients
