PREMIUM ISOLATE-ENHANCED PROTEIN

Proper nutrition around workouts is essential for muscle recovery and growth. Research shows that consuming high-quality protein before or after exercise enhances muscle repair and helps shift the body from a catabolic (muscle-wasting) state to an anabolic (muscle-building) state. Whey protein is widely recognized as the gold standard for pre- and post-workout protein because of its impressive Biological Value (BV) of 112 and Digestible Indispensable Amino Acid Score (DIAAS) score of 1.03. These values indicate that whey protein is absorbed more efficiently and utilized faster than other protein sources. Its complete amino acid profile, rich in naturally occurring Essential Amino Acids (EAAs) and Branched-Chain Amino Acids (BCAAs), supports muscle development and promotes muscle protein synthesis*

Smart Protein Technology: Regular whey protein is great—but ALLWHEY® GOLD is even better. It undergoes an advanced cross-flow microfiltration process that removes excess fat and lactose without compromising protein integrity. This ensures higher purity and faster absorption, helping strengthen muscles and improves recovery.*

Less Carbs, Less Fat, More Protein Per Scoop: ALLWHEY® GOLD boasts an impressive 75% protein content! Each scoop delivers 24 g of pure whey protein, with only 4 g of carbs and just 130 calories per serving. This means you get all the benefits of high-quality whey protein without unnecessary carbs or fillers—maximizing muscle growth.*
