WHAT MAKES YOU SWEAT?

YOUR INTRA/POST SPORT RECOVERY

New CARBION⁺ has taken hydration to a whole new level. Not only is it the best tasting, most refreshing drink you've ever tasted but it will improve your training and deliver better results. You need carbohydrates to fuel your muscles and delay the onset of fatigue. CARBION⁺'s phased delivery carbohydrates will maintain your blood glucose levels longer so you don't crash and you can keep going longer and harder at a higher level of performance. When you sweat, you lose electrolytes as well as water. If your levels of electrolytes drop too far, performance suffers. Increased levels of highly absorbable electrolytes in new CARBION⁺ will ensure you stay hydrated so you can retain and utilize the fluids you are consuming.

Cyclo-D™
Highly- Branched Cyclic Dextrin

PER4ORM™
4-Form Phased Release Dextrin Polysaccharide

AWM2300™
Ultra-High Molecular Weight Amylopectin Waxy Maize

CocoH2™
Concentrated Coconut Water

Available Size:
25 Servings

TRAIN HARDER + RECOVER FASTER + GET RESULTS!

Additionally, the absorption blend in CARBION⁺ helps to initiate the uptake of blood glucose into cells, meaning more actual fuel in the muscle. And finally CARBION⁺ is 3rd party tested for banned substances so it can be safely taken by tested athletes without concern. Add new CARBION⁺ to your workout routine and attain new levels of performance that you never knew were possible.

CARBION⁺ is now infused with all 4 key Electrolytes: Sodium, Potassium, Magnesium and Calcium, at higher levels than previous versions to keep up with the demands of hard working, high performance athletes.
