## Growth-Stimulating Pumps:

Athletes have long sought the exhilaration of pulse-pounding pumps. They loved the look and feel but what they didn't all know was that the pump was also inducing muscle growth. Physical pressure on the cells caused by the pump during intense physical training triggers myofibril hypertrophy (muscle cell growth). IMPACT PUMP XTREME integrates the finest pump-inducing ingredients alongside nootropics, strength enhancers, endurance support, and hydration elements, all at full clinical dosages, in one powerful formula.\*
