

L-CARNITINE+ TARTRATE

- Aids in Muscle Recovery and Reduces Muscle Tissue Damage*
- Helps improve physical performance and tissue formation*
- Increases metabolism of fats (supports body fat reduction)*

Stimulant-Free Fat Metabolizer

L-Carnitine is essential for transporting long-chain fats into the cell (mitochondria). L-Carnitine taps into your fat supply and may provide support to burn it as fuel, resulting in increased energy. Without L-Carnitine, these fats cannot be burned for energy and are instead shunted to stored body fat.*

Boost Energy, Endurance & Performance

L-Carnitine enhances performance by increasing the body's reliance on fat for energy; this reduces depletion of muscle glycogen. By reducing muscle tissue lactic acid build-up, performance athletes using L-Carnitine can extend duration of muscular exertion before fatigue.*

ALLMAX L-Carnitine L-Tartrate (LCLT) provides 60 full servings per bottle while delivering 1,000 mg of L-Carnitine in each serving.

Supplement Facts

Serving Size 2 Capsules		
Servings Per Container 60		
Amount Per Serving		% Daily Value
Vitamin B5 (as D-Calcium Pantothenate)	20 mg	400%
L-Carnitine L-Tartrate (supplying 1,000 mg L-Carnitine)	1470 mg	†
Percent Daily Value are based on a 2,000 calorie diet.		† Daily Value not established.
Other Ingredients: Vegan Caps (Hypromellose), microcrystalline cellulose, silicon dioxide, magnesium stearate.
