NMN

- NAD+ Precursor*
- Energy Metabolism*

NICOTINAMIDE MONONUCLEOTIDE

Nicotinamide Mononucleotide (NMN) is a precursor to Nicotinamide Adenine Dinucleotide (NAD+), a coenzyme involved in energy metabolism and essential biological functions. NMN helps support the maintenance of good health and provides antioxidant that protect cells against oxidative damage.*

As NAD+ levels naturally decline with age, NMN supplementation helps support healthy NAD+ levels in the body.*

ALLMAX NMN delivers a high-potency 500 mg NMN dose per capsule to support overall well-being.*

Supplement Facts

Serving Size 1 Capsule
Servings Per Container 60

Amount Per Serving	% DV
--------------------	------

β-Nicotinamide Mononucleotide (NMN)	500 mg †
--	-----------------

† Daily Value (DV) not established.

Other Ingredients: Vegan capsule (Hypromellose), Microcrystalline Cellulose, Magnesium Stearate (Vegetable Source), Silicon Dioxide.
